

# Memoscope®

Memoscope is a practical and adaptable desktop solution that allows you to support documents, organize, be ergonomic, and look good while doing it! Your Memoscope will utilize the dead space between your keyboard and monitor and add a splash to your desktop décor.

## COMPONENTS

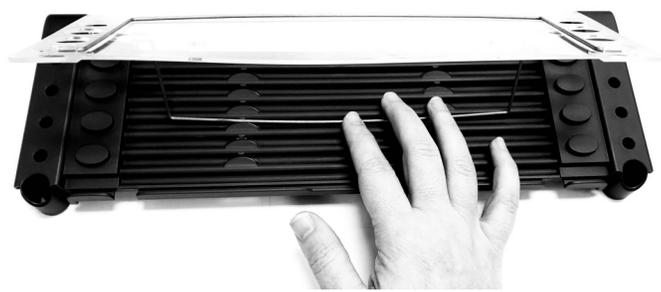

## 1 TO GET STARTED

Remove your Memoscope **Base** from the padded sleeve and turn it over. Two slide pads (small, clear circles) have already been attached to the underneath front of the **Base** (A). Your Memoscope also includes 2 round, BLACK, dime-sized Micro-Stabilizers attached to the underneath back of the **Base** (B). To activate this very cool feature, gently remove the CLEAR covering from each black Micro-Stabilizer. This allows your Memoscope to bond to flat surfaces with NO ADHESIVE and no residue. To reposition your Memoscope, simply lift, reposition, and press down on the **Base**.

## 2 ANGLE ADJUSTMENT

Lift the Easel and gently swing out the **Angle Adjustment Wire**. Snap it gently into one of the 6 slots in the **Base** for various angle options for the **Easel**. You may need to reach around the **Easel** and gently press with your fingers to snap the wire into the **Base's** opening. Experiment with different angles. Have fun! Enjoy being **Ergonomic!**

Included in your Memoscope are multi-colored easel **Inserts**. Slide one into the slots on the back of the **Easel**. Or if you prefer, personal photos will also fit into these slots. Have fun with the look and personality of your workstation! Gone are the days when your workstation had to be boring and drab!

## A SUPER-COOL FEATURE OF MEMOSCAPE

1) Gently slide the **Arm** through the hole in the holder. The rib on top of the **Arm** must align with the notch in the **Holder**. Do not force it.  
2) Insert **Arm** pin firmly into any of the 8 holes on the sides of your Memoscope **Base**. You can adjust the **Holder** on the **Base** based on which side you choose.  
3) Your **Holder** has 2 slots for papers, light documents, lists, etc., and will pivot on the **Base** for various angles.

## 4 SIDEARM AND HOLDER

For full-sized document support, simply lift up the **Height Support Wire**.  
The **Easel Lip** attaches to the holes on either side of the easel. Gently slide the hooks on the **Easel Lip** into one pair of holes. For small document support, the top two holes are ideal. For below-desk keyboards or sit-stand desks, use the lowest pair of holes in the **Easel**.  
To change the height of the **Easel Lip**, gently slide it up from the two holes until it disengages, and attach it to a different pair of holes.  
The **Easel Lip** will fit snugly to provide maximum stability.

## 3 HEIGHT ADJUSTMENT
